

Opportunity for **Automation Specialist**

Vitau Automation • Belo Horizonte, Minas Gerais • vitauautomation.com

The ideal candidate will be responsible for conceptualizing and executing clear, quality code to develop the best software for industrial automation applications. You will be working with the state-of-art multi-technologies applied to the Industry 4.0. You will develop/test your code, immerse in the client reality, identify potential improvements, and iterate to ensure quality code. This job can be either from home office, standard office, or industry/client's site.

Responsibilities

- Develop web software;
- Implement solutions in the client site;
- Detect and troubleshoot software issues;
- Develop, implement, and test APIs and other interfaces;

Qualifications

- Comfort using development frameworks, relational databases and cloud resources;
- Some nice-to-have (not mandatory): Python, C#, .NET, front-end framework, industrial networks, embedded systems, linux, AWS, Git;
- Strong debugging and troubleshooting skills;
- Good communication skills;
- 1+ years as dev.
